# GOPHER GETTERS

## GOPHER GETTER JR.

A new, inexpensive cartridge loaded unit which dispenses poison bait underground in pocket gopher's natural runway, out of the reach of harmless birds and pets.

**STEP 1:** To poison pocket gophers, the natural runway must be located by probing about 12" to 18" from the mound on the side of the horseshoe shaped depression

**STEP 2:** When runway is found, press button on top of the handle allowing the inside shaft to telescope. Pull the unit out of the ground, holding the button. The bait automatically drops into the gopher runway.

## THREE POINT HITCH MODEL GA-400

*Equipped with 18" coulter*

Proven by actual field tests, the Elston Gopher Getter builds and baits artificial pocket gopher unways in one fast, sure operation. Users praise the effectiveness of the kill, the sturdy design and construction, and the easy low-cost technique.

- Adjustable depth torpedo (6"-12") forms artificial runway that intercepts and connects natural pocket gopher runways
- Bait distributor meters bait in preset quantities
- Fast - one man economically treats up to 10 acres of infested area per hour
- Safe - Bait is underground, out of reach of grazing animals
- Economical - Bait costs are only a few cents per acre
- Simple and rugged design
- Pneumatic tires (included) and high speed wheel bearings for easy highway transportation
  - ♦ Replaceable hardware steel torpedo point
  - ♦ Easily attached to tractor

## DRAW BAR MODEL GA-500

Standard hydraulic operation and three point hitch models are not interchangeable. Specify desired model when ordering.

Hydraulic cylinder required.
