

# TREE PLANTER

**TP SERIES PLANTER** is designed for high production tree planting. This rugged built planter is capable of planting up to 500 trees per hour. The TP-1000 is more efficient than planting with an auger and greatly reduces the time and labor of hand planting. Equipped with two rubber tire packing wheels that firmly pack soil around each tree and are easily adjustable to accomplish 6" to 18" depths. Designed with a wide furrow opener to handle a variety of trees such as: apple, cherry, pear, peach, nectarine, grape, blueberry and nursery tree stock. Furrow opener shank is equipped with a heat-treated replaceable point and chrome alloy hardfacing wear strip. Planter is equipped with large capacity plant boxes and a padded cushion seat.
